

Organic lovers, since 1976.

Our VALUES

QUALITY.

Each raw material is subjected to rigorous analyses carried out by **accredited laboratories**, to check that organic standards have been respected.

We operate in full compliance with specific international regulations: every day we work with enthusiasm to achieve new goals, among which we can be proud of the **BRC** and **IFS** food certification that we obtained with the highest level, with an **Unannounced Audit**.

KOSHER CERTIFIED

FOOD SAFETY AND TRANSPARENCY.

We have implemented an innovative system that allows the consumer to check the laboratory analyses carried out on the products by scanning the QR code on the packaging.

SUSTAINABILITY.

We have always been **environmentally conscious**, offering organic products. We use **solar energy** produced by our solar panels and energy from renewable sources. Furthermore, our company and our products are now **certified carbon neutral**: all CO₂ produced by our work is 100% offset, making our business sustainable and in balance with the planet.
